

NAME

dhcmmemu-dump – Dump emulator database from load file

SYNOPSIS

dhcmmemu-dump *inputfile*

DESCRIPTION

dhcmmemu-dump dumps the content of a database file to text format. The database file will previously have been created from text but may be modified by the action of the emulator, **dhcmmemu**. This utility allows you to see the changes.

OPTIONS

inputfile Input database file. The format of the output is identical to the input described in **dhcmmemu-load**.
