Dimensions (H x W x D)	28.700" x 47.800" x 3.900"	

#### Footnotes

- Optional set-top receiver required to view DTV programming. Optional external over-the-air antenna may be required for ATSC reception. If your cable company "passes through" a DTV signal unchanged, an optional HDTV set-top receiver can decode and tune the program. However, standards for cable connectivity have not been finalized. Consequently, this product may not be compatible with your cable system.
